# Tutorial

# Endb SQL

Here is some sample SQL:

```
INSERT INTO posts (id, user_id, text)
VALUES (1234, 5678, 'Hello World!');

SELECT * from posts;
```

Here is some eSQL:

```
INSERT INTO people (id, name, friends)
VALUES (5678, 'Steven',
       [{'user': 'Preethi'},
        {'user': 'Sandy'}]);

SELECT people.friends[2] FROM people;
```

# Architecture

Behold, a fake architecture diagram:
